COMFORT

GLASdek® Evaporative Media

- Evaporative media made from inorganic, non-combustible, ceramical material
- High efficiency: 65%, 85% and 95%
- Low pressure drop
- Tested against the transfer of Legionella (with contaminated water and air born bacteria's) by external body
- Approved according to VDI 6022
- Tested and approved according to Loosening of Air born Fibers, no risk of over-saturation
- No water treatment required
- GX media - high tolerance for pH levels in water - up to 10 pH is no problem
- Non-sensitive for chemical treatment
- ISO 9001
- GREENGUARD Gold Certified

Munters premium evaporative media

Munters is the original inventor of structured media, proven and produced for over 50 years. is a high efficiency evaporative cooling media that is engineered to provide maximum cooling and humidification, low pressure drop and years of reliable service. The media is made from inorganic, non-combustible material.

It allows the use of water straight from the tap with no need for water treatment (i.e. demineralisation plants). In cases with non-sufficient water quality, it may be necessary to add a water treatment. No silver ionization filter is needed. Minerals and pollutants stay behind in the GLASdek evaporative media to be washed away with the discharge water keeping the total humidification process pure.

GX40

GX60

Tested and classified

The inorganic material GLASdek has been fire tested and classified as non-combustible material according to ISO 1182. RoHS compliant. Tested against the transfer of Legionella (with contaminated water and air born bacteria's) by external body. Certified for hygiene (no aerosols containing bacteria or Legionella at the University of Aachen, Germany by PD Dr. Med. Sebastian W. Lemmen.

GREENGUARD GOLD

Munters high performance media is GREENGUARD Gold certified and has been tested for emissions from over 360 individual chemicals of concern, guaranteeing them as having non-harmful emissions. Read more on www.munters.com/greenguard

APPLICATIONS

- Evaporative cooling
- Commercial cooling
- Industrial cooling
- Plastic
- Wood
- Textile
- Electronics
- Data centre

Easily installed modular cassette design make servicing and replacement quick & efficient.

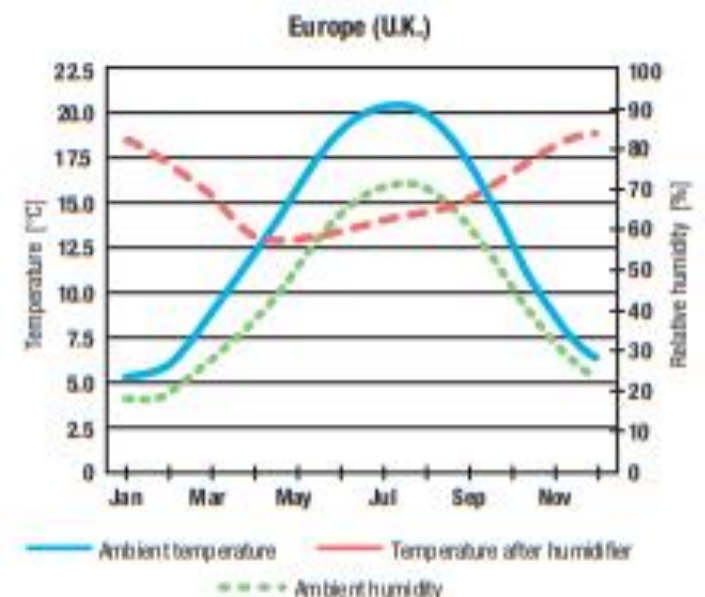

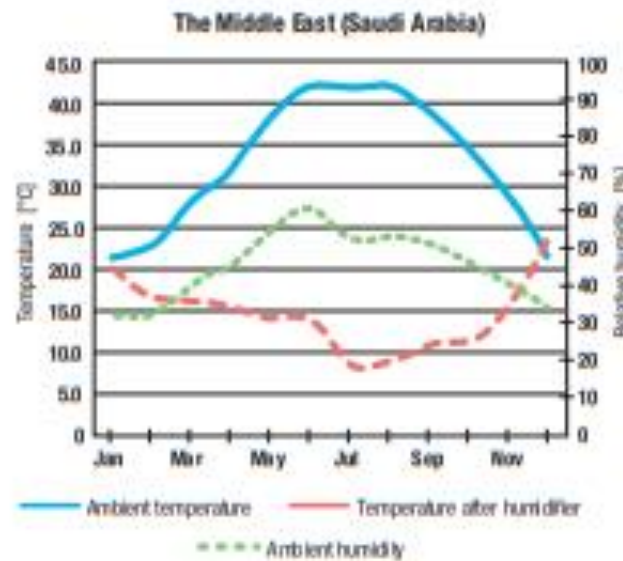

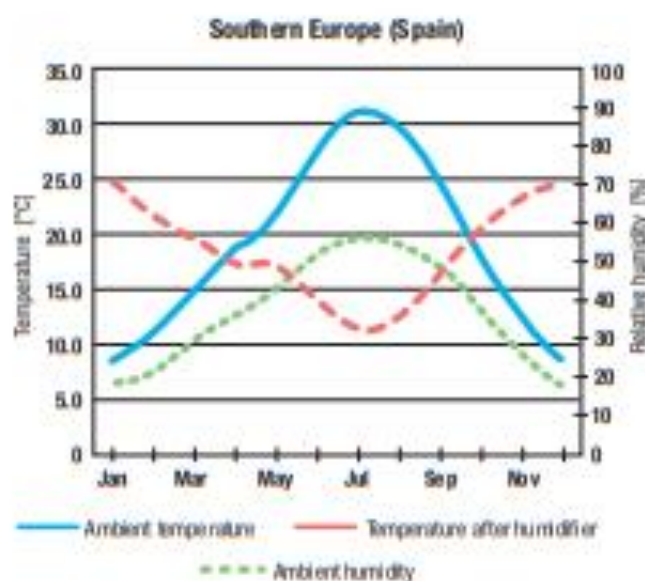

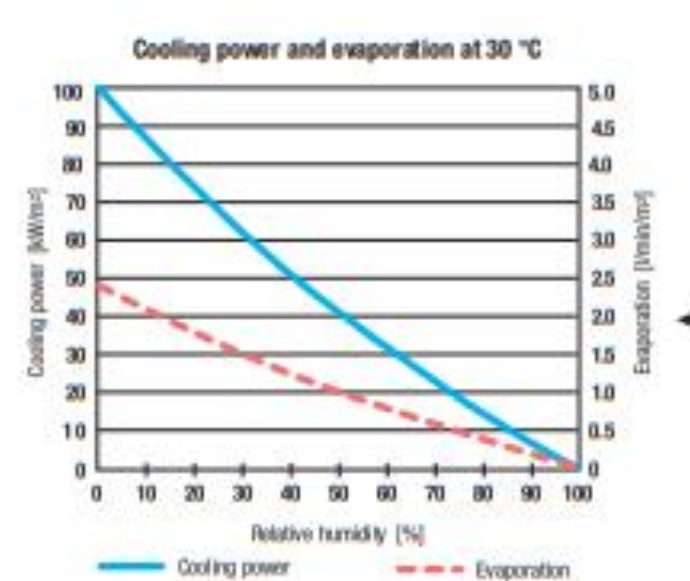

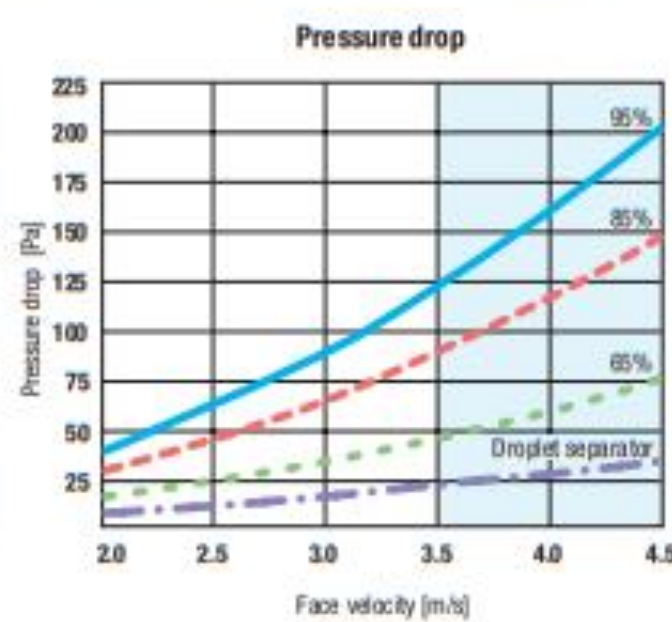

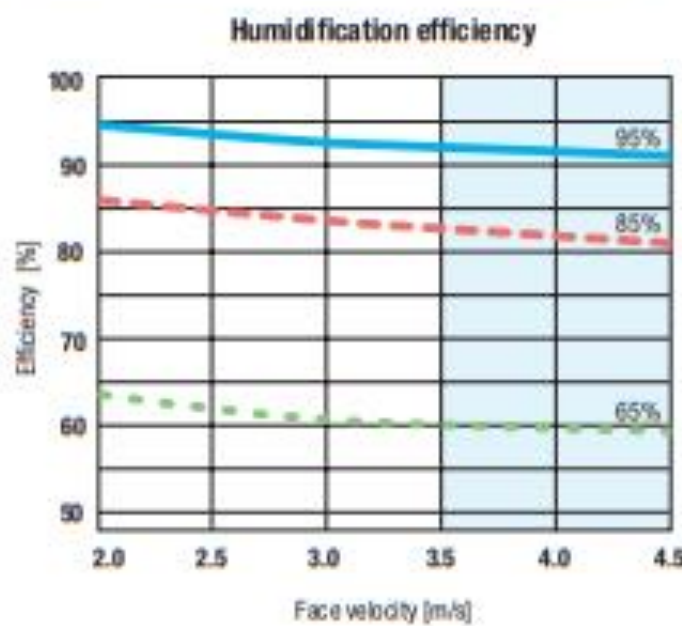

GX40 media assembled in Munters FA6 humidifier.

GX60 media assembled in Munters FA6 humidifier.

High performance evaporative media

Cooling power specified per m² surface area at 4.5 m/s and 95% humidification efficiency.
